PROFESSIONAL SUMMARY

Senior IAM Engineer with 8+ years of experience building identity governance and privileged access solutions across healthcare, financial services, and retail. Expertise in SailPoint IdentityIQ/IdentityNow, CyberArk PAM, and cloud identity platforms to automate joiner/mover/leaver workflows, enforce RBAC and segregation of duties, and uphold SOX and HIPAA compliance. Proven track record of designing scalable IAM frameworks and optimizing provisioning and certification processes.

CORE COMPETENCIES

- **Core Competencies:** Identity Lifecycle Management (JML), SailPoint IIQ / IdentityNow, CyberArk PAM, RBAC & Role Mining, Segregation of Duties (SOD), Access Certification, SSO / SAML / OAuth / OIDC, Azure AD / AWS IAM / GCP, REST API Development, SOX / HIPAA / NIST Compliance, BeanShell / Java / PowerShell / Python, ServiceNow Integration, CI/CD (Git, Jenkins), Privileged Access Management, SOX ITGCs Logical Access Controls, Joiner/mover/leaver Processes, System Configuration
- **IAM Platforms:** SailPoint IdentityIQ (IIQ 7.x/8.x), SailPoint IdentityNow (IDN), Okta, ForgeRock, Ping Identity, Delinea, Azure PIM
- **PAM:** CyberArk PAM, Privilege Cloud, Vault, PVWA, CPM, PSM, PSMP, AAM, Conjur, Secret Server, JIT Access, Dual Control
- **Directories & Connectors:** Active Directory, Azure AD (Entra ID), LDAP, OpenLDAP, AWS IAM, Google Workspace, JDBC, Web Services, SAP, Epic, Workday
- **Programming & Scripting:** Java, BeanShell, Python, PowerShell, JavaScript, SQL, XML, JSON, YAML, REST API, Microsoft Graph API
- **Authentication & Federation:** SAML 2.0, OAuth 2.0, OpenID Connect (OIDC), SCIM, Kerberos, WS-Federation, TLS/SSL
- **Cloud Platforms:** Microsoft Azure, AWS, GCP, SaaS Application Onboarding, Cloud Identity Integration
- **DevOps & Tooling:** Azure DevOps, Jenkins, Git, CI/CD Pipelines, Docker, Kubernetes, Apache Tomcat, Oracle WebLogic
- **ITSM & Monitoring:** ServiceNow, JIRA, Splunk, SailPoint Reporting Framework
- **Compliance Frameworks:** SOX, HIPAA, PCI DSS, GDPR, CCPA, NIST CSF, ISO 27001

PROFESSIONAL EXPERIENCE

API Healthcare

Jun 2023 - Present

Senior IAM Engineer

Hartford, WI

- Led full lifecycle implementation, system configuration, and enhancement of SailPoint IdentityIQ (IIQ) in a large-scale healthcare environment supporting 25,000+ identities across 150+ integrated applications, ensuring secure identity governance across clinical and non-clinical systems.
- Architected and automated joiner/mover/leaver processes integrated with Workday and Active Directory, cutting manual provisioning effort by 50% and reducing orphan/dormant account incidents by over 40%.
- Designed enterprise-wide RBAC framework and conducted role mining initiatives using SailPoint analytics to eliminate toxic combinations and reduce excessive entitlements by 35%.
- Engineered and optimized access certification campaigns (Manager, Application Owner, Role-Based) aligned to SOX ITGCs logical access controls and HIPAA requirements, achieving a 98% certification completion rate within SLA.
- Implemented SOD policies and risk scoring models aligned with NIST and ISO 27001, proactively detecting policy violations before audit cycles.
- Developed custom SailPoint rules in BeanShell/Java (Correlation, Before/After Provisioning, Field Value, Identity Attribute, Certification Exclusion) that enabled automated lifecycle processing and reduced manual intervention
- Built and deployed custom connectors (REST API, JDBC, Delimited, Web Services, SAP, Epic) for onboarding critical systems into the SailPoint ecosystem.
- Improved SailPoint job performance by 28% through JVM tuning, SQL query optimization, and task definition refinements on Apache Tomcat and WebLogic environments.
- Integrated SailPoint with ServiceNow for automated access request fulfillment and approval routing, enabling audit-traceable ticket-based provisioning.
- Led IIQ version upgrades and patch management across DEV/QA/UAT/PROD environments using Git, Jenkins, and CI/CD pipelines.
- Collaborated with cybersecurity teams to implement MFA, SAML-based federation, and Azure AD synchronization.
- Collaborated with cybersecurity teams to implement MFA, OAuth 2.0, SAML-based federation, and Azure AD synchronization.
- Integrated CyberArk PAM vault with SailPoint IIQ using REST API for automated privileged access management, reducing manual credential handling by 60%.

Discover Financial Services

Jun 2021 - Mar 2023

IAM Engineer

Riverwoods, IL

- Managed end-to-end identity provisioning and deprovisioning workflows based on joiner/mover/leaver processes across cloud and on-premises applications, reducing access removal lag by approximately 30%.
- Onboarded SSO solutions and resolved federated access issues using SAML 2.0, OAuth 2.0, and OIDC, supporting seamless authentication for 10,000+ users.
- Built and maintained SailPoint IdentityIQ connectors for third-party enterprise applications, enabling real-time identity synchronization.
- Supported SailPoint IDN integration with AWS, Azure, and GCP cloud services, improving cloud identity governance visibility.
- Coordinated access certification campaigns ensuring all reviews met SOX ITGCs logical access control requirements; generated compliance evidence packets to accelerate audit response cycles.
- Collaborated with security and compliance teams using SailPoint IIQ and CyberArk PAM to define and enforce segregation of duties (SOD) policies, detecting high-risk access combinations and strengthening audit compliance
- Provided troubleshooting support for SAML assertion failures, OIDC token claim mismatches, and AD attribute synchronization issues by analyzing SailPoint IIQ logs and running PowerShell scripts, which restored authentication services and reduced incident-resolution time
- Integrated ITSM access request workflows with ServiceNow, reducing rework in provisioning tickets.
- Documented IAM best practices, workflow configurations, and identity governance processes in Confluence for internal teams and stakeholders, enabling faster onboarding and consistent policy application
- Implemented SCIM-based provisioning for cloud applications to standardize identity data formatting and reduce onboarding errors by 25%.
- Automated identity lifecycle workflows using Python and PowerShell scripts to streamline joiner/mover/leaver processes and cut processing time by 20%.

Target Corporation

Mar 2018 - Feb 2021

IAM Engineer

Minneapolis, MN

- Deployed and configured SailPoint IdentityIQ to centralize identity governance for 25,000+ users across retail, supply chain, and corporate systems.
- Engineered HR-driven identity lifecycle automation and scalable RBAC role hierarchies for store operations, merchandising, and IT teams, reducing manual provisioning requests by approximately 35%.
- Configured segregation-of-duty (SOD) rule policies in SailPoint IdentityIQ, which automatically flagged high-risk conflicts in financial and inventory management systems, helping auditors identify and resolve violations before they impacted operations
- Onboarded privileged retail application accounts into CyberArk and implemented JIT access request workflows connecting SailPoint IIQ and CyberArk, enabling controlled privilege elevation.
- Administered quarterly and ad-hoc access review campaigns using SailPoint certification modules to maintain SOX compliance posture.
- Integrated SailPoint IdentityNow with cloud SaaS applications via REST API and SCIM, improving hybrid identity governance.
- Supported deployment of adaptive MFA mechanisms for remote workforce access during expanded hybrid work operations.
- Collaborated with audit and compliance teams, providing certification data and SOD reports as governance evidence.

EDUCATION

Webster University

Master of Science, Cybersecurity Operations

St. Louis, Missouri

CERTIFICATIONS

- SailPoint Certified IdentityIQ Engineer
- CyberArk Defender / Trustee
- Microsoft SC-300: Identity & Access Administrator
- CompTIA Security+
